

# Cavalry™ Catalyst

High Surfactant Oil Concentrate  
Water Conditioning Agent • Deposition Aid

## Principal Functioning Agents

Methyl soyate; isodecanol, ethoxylated,  
phosphate ester; tallow alkyl amines ethoxylated .....89.98%  
Constituents ineffective as a spray adjuvant .....10.02%  
Total .....100%  
All ingredients are exempt from tolerance under 40 CFR 180.

## Product Details

Cavalry™ Catalyst is a multi-functional, high-efficacy adjuvant that helps activate herbicides for better performance against tough to control weeds, including later season weeds. Its unique formulation includes tallow amine which acts as an emulsifier and surfactant to help herbicides spread over the leaf for better absorption.

Cavalry Catalyst contains deposition aids that minimize off-site spray droplets and improve canopy penetration and plant coverage.

Cavalry Catalyst contains a highly refined soybean oil that improves the performance and handling characteristics versus traditional high surfactant methylated seed oil formulations.

## Application Directions

**Ground or aerial:** 2-4 qt/100 gal with herbicides that can utilize or require an MSO adjuvant

### Compatibility

Tank mixtures should only be applied within the label recommendations of every product in the tank mixture. Use only if an HSOC and water conditioning agent is allowed or not excluded on the label.

\* Cavalry Catalyst satisfies the requirement for a drift reducing adjuvant in an ESA drift mitigation calculation. Follow pesticide label directions for use rate.

## Key Features

- 1 Made with highly refined soybean oil and a high-efficacy adjuvant, tallow amine, for enhanced stability, performance and mixing.
- 2 Flexible across a broad range of herbicides.
- 3 High-quality concentration of emulsifiers and methylated seed oil.

## Package Size

2 x 2.5 gal | 275 gal
