

# Cavalry™ EZ

Nonionic Surfactant • Humectant  
Water Conditioning Agent

## Principal Functioning Agents

Diethylene glycol, propylene glycol, urea sulfate .....100%  
All ingredients are exempt from tolerance under 40 CFR 180.

## Product Details

Cavalry™ EZ is a proprietary blend of water conditioning agents, superior nonionic surfactants and humectants.

Cavalry EZ contains an ingredient, that when added to the spray water, reacts to form both nitrogen and sulfate. The nitrogen combines with glyphosate (and other pesticides) to improve the uptake and translocation. The sulfate combines with impurities in the spray solution (calcium, iron, magnesium, sodium and other salts) preventing them from binding with the pesticide and antagonizing the tank mix, reducing the weed control.

Cavalry EZ will not only maintain certain pesticides, such as glyphosate, in their most active form, but it also improves droplet coverage and canopy penetration while slowing droplet drying, all of which combine to increase pesticide absorption into plants.

## Application Directions

1-2 qt/100 gal tank mix for most pesticides

## Key Features

- 1 Superior blend of water conditioning agents effective at alleviating hard water antagonism.
- 2 Unsurpassed droplet coverage and canopy penetration.
- 3 Low use rate as compared to AMS-based products.

## Package Size

2 x 2.5 gal | 275 gal
